Permanent | 60,000 - 100,000 | Central London

We are one of the most exciting and successful technology organisations across the globe and are looking for a talented Software Engineer who has prior DevOps exposure to join their passionate and world-class technical team. In this position, you will be responsible for building a global platform within an advanced and complex technical environment which can deal with hundreds of millions of active users. You will be building fast, secure and scalable solutions in the most efficient way possible with one of the most modern stacks out there.

Do you have an inquisitive, curious and innovative way of thinking? This position offers someone with this approach alongside an outstanding technical environment with large scale distributed systems and an opportunity to work with the latest Development and DevOps tools and technologies such as Scala, Golang, Puppet, Chef, Docker, Mesos, Netflix OSS and Hystrix within an advanced cross-functional environment.

We are passionate about Computer Science principles, so a strong understanding and background in this field are essential. In the team, we all share a passion for modern technology and being at the top of our game. We're always making our minds work and making new discoveries, if you have a similar approach to technology, then you would fit in well with us! We like to get involved in the Open Source community and bounce off our colleagues and others in the Open Source space to ensure we have the best platform out there.

We are looking for someone with excellent software engineering skills in languages such as Golang, Ruby or Scala who has also worked with deployment tools such as Jenkins, Git, Puppet or Chef to become part of an innovative technical team. Microservice experience with Mesos or Docker is also a huge bonus! If you take this next step into our company, you will not be disappointed by the technical challenges that arise! Working in a diverse and talented technical team with a variety of strengths and backgrounds, you will have the opportunity to work in a dynamic flat structured environment where tech is the core focus. Think you're up for the challenge? Please get in touch if you would like to find out more to have the opportunity to work for one of the most exciting tech companies we have worked with!
