DESCRIPTION

Software Engineer in Test | Nottingham | Web | React | Node | Agile | AWS | Protractor | Chai | Chakram | £40,000 - £47,000

Method Resourcing have partnered with a leading financial service's organisation who're scaling their quality engineering practice. You will help push their journey into the public cloud, deal with problems at scale and tackle security and performance issues as well as increase quality through every stage of the SDLC as they adopt the "shift left" approach to testing.

The successful Software Engineer in Test will have the following experience:

Comes from a quality engineering background with the ability to write code in any language or comes from a developer background with an appreciation for quality

Has strong working practices of Agile

Encourages cross functional, collaborative ways of working by adopting code review, pair programming, 3 Amigo's, refinement sessions

Improves CI/CD process by running the tests after each deployment

Working closely with the product owners and developers to identify edge cases and error scenarios for the new features.

Investigates current performance of the app and feedback this information back to the teams

Has experience working with open source automaton tools. Tech you will get to work on
