Our Purpose We work to connect and power an inclusive, digital economy that benefits everyone, everywhere by making transactions safe, simple, smart and accessible. Using secure data and networks, partnerships and passion, our innovations and solutions help individuals, financial institutions, governments and businesses realize their greatest potential. Our decency quotient, or DQ, drives our culture and everything we do inside and outside of our company. We cultivate a culture of inclusion for all employees that respects their individual strengths, views, and experiences. We believe that our differences enable us to be a better team – one that makes better decisions, drives innovation and delivers better business results. Job Title Manager, Product ArchitectureOverview:This is a product architecture role within Vocalink's SD&A team accountable for the software architecture of Vocalink's International Analytics Cloud platform. The role is responsible for providing the design, technical direction and thought leadership for the architecture; making sure it meets current and future business needs. The candidate will work closely with the Analytics Data Science and Product Teams to understand the drivers, goals, requirements and desired outcomes for the platform; and also the Platform Engineering Team to enable it's delivery.Role:•Thought leadership and technical

Manager, Product Architecture   **Price £0**
