**DESCRIPTION**

A parenting network with chat rooms, a local business and event platform, and web content is now looking for an experienced, self-motivated Front and Back End Web Developer to join their London based team.

Although the company will consider remote (work from home) candidates, you will need to be an exceptional candidate with a commitment to producing high quality work in a timely manner as would be expected of you from working in an office environment.

Responsibilities include:

Plan and architect the technology for many new features - including live chat, video sharing webinar hosting, member connections, and online booking systems

Migrate the website, its content, and its community forums onto a new custom framework

Deliver projects to agreed deadlines

Deliver projects in good quality and after thorough testing

Problem-solve any issues with the site, including diagnosing and correcting any bugs

Maintain and improve the operations and speed of the website in its current form

Apply technical SEO best practices to improve site speed and performance

Able to work either alone or in a small team

Able to communicate effectively with the other team members about the work, both

## Full Stack Web Developer; PHP & JavaScript - Complex Platform

Price £0

developers and non-developers

### Key Requirements:

5 years+ experience in development, testing, and deployment of web applications  
Comfortable with custom-coding new applications without reliance on plug-ins  
Fluent or native level of English language is necessary  
Knowledge and experience of all stages of web development  
Extensive development experience using PHP, HTML5, Javascript, Java  
Optional experience in C, C++, Ruby, React, Python, and microservices  
Enjoy problem-solving  
Self-motivated and able to work on your own initiative  
Excellent communication skills, especially in understanding requirements and explaining technical or complex concepts

### The website includes:

Interactive community rooms where members can connect and share images and messages.  
This is being migrated onto a new framework  
Web content currently on WordPress, which will be migrated onto a custom framework  
A unique local listings platform where businesses can list their events, recurring events, and services

They are looking for a full-stack developer with experience working on web platforms with similar features.

### Preference for those who have experience in one or more of the following:

Technical SEO  
Live chat web applications or similar community spaces with user-generated content  
Phalcon framework
